## Automatiq

Measurement Systems

## Overview

Automatiq provides components for Versi-Traq Test Fixtures. This datasheet provides information and pricing for pogo pins and sockets, push down pins, foam spacers, interlock switches, and safety skirts.

## Ordering Information

## *Pogo Pins \& Sockets

Sockets are pressed into the Probe Plate, usually flush with the top surface.
Pogo pins are inserted into the sockets from the top and can be replaced by pulling out the old pin and pushing in the new pin.
The pogo pin size depends on the center to center distance between the probe points.

- Pins that can mount on $0.100^{\prime \prime}$ centers are the least expensive and most rugged pins. They should be used whenever possible.
- Pins that can mount on $0.075^{\prime \prime}$ centers are somewhat more expensive but are nearly as rugged as the $0.100^{\prime \prime}$ pins.
- Pins that can mount on $0.050^{\prime \prime}$ centers are much more expensive and much less rugged than other pin sizes. They are not recommended for most Test Fixtures.
The head of the pogo pins will depend on the nature of the probe points being contacted on the board.
- Crown heads can be used for through-hole pins or leads.
- Small Chisel heads can be used for test pads.
- Large or Small Chisel heads can be used for open holes (large enough to avoid going through the hole).
- Round heads can be used for gold pads or sockets only.
- Spear heads can be used for component pads to avoid slipping on sloped surfaces.
- Razor Sharp heads can be used for no-clean solder boards because the heads will mark the test points on other boards.

## *Guide Pins

We recommend using hardened drill blanks for guide pins. They can be cut to 1.000 " long using a rotary tool with a cutoff wheel. Purchase the blanks from any mill supply house.

| Item | Order Number | QA Tech \# | $\begin{gathered} \text { Price } \\ 1-49 \end{gathered}$ | Price $50+$ |
| :---: | :---: | :---: | :---: | :---: |
| 0.125" Solder Cup Socket | CON00051.01 | 125-SDN250S | \$2.37 | \$1.58 |
| 0.125" Crown Pin | CON00052.01 | 125-PRG2556S | \$5.64 | \$3.76 |
| 0.125" Large Chisel Pin | CON00052.04 | 125-PRG2503S | \$5.64 | \$3.76 |
| 0.100" Solder Cup Socket | CON00013.01 | 100-SDN250S | \$0.66 | \$0.44 |
| 0.100" Crown Pin | CON00014.01 | 100-PRG2558S | \$2.04 | \$1.36 |
| 0.100" Round Pin | CON00014.02 | 100-PRG2540S | \$2.04 | \$1.36 |
| 0.100" Small Chisel Pin | CON00014.03 | 100-PRG2543S | \$2.04 | \$1.36 |
| 0.100" Large Chisel Pin | CON00014.04 | 100-PRG2503S | \$2.04 | \$1.36 |
| 0.100" Spear Pin | CON00014.06 | 100-PRG2541S | \$2.04 | \$1.36 |
| 0.100" Razor Sharp Pin | CON00014.08 | 100-PRG256RX-S | \$2.04 | \$1.36 |
| 0.075" Solder Cup Socket | CON00045.01 | 075-SDN250S | \$1.47 | \$0.98 |
| 0.075 " Crown Pin | CON00046.01 | 075-PRG2558S | \$3.93 | \$2.62 |
| 0.075" Round Pin | CON00046.02 | 075-PRG2540S | \$3.93 | \$2.62 |
| 0.075" Small Chisel Pin | CON00046.03 | 075-PRG2543S | \$3.93 | \$2.62 |
| 0.075 " Large Chisel Pin | CON00046.04 | 075-PRG2503S | \$3.93 | \$2.62 |
| 0.075" Spear Pin | CON00046.06 | 075-PRG2541S | \$3.93 | \$2.62 |
| 0.050" Solder Cup Socket | CON00049.01 | 050-STB255P | \$3.12 | \$2.08 |
| 0.050" Crown Pin | CON00050.01 | 050-PTP2558S | \$6.15 | \$4.10 |
| 0.050" Small Chisel Pin | CON00050.03 | 050-PTP2543S | \$6.15 | \$4.10 |
| 0.050" Large Chisel Pin | CON00050.04 | 050-PTP2503S | \$6.15 | \$4.10 |

## Ordering Information

## *Foam Spacers

Foam Spacers are used, when necessary, to stabilize the circuit board as it is inserted and pushed down onto the pogo pins. They are self adhesive.

| Item | Order Number | Price 1-9 | Price 10+ |
| :---: | :---: | ---: | ---: |
| Foam Spacer; 0.500" | FMP00024.500 | $\$ 1.50$ | $\$ 1.00$ |

## *Push Down Pins

Push Down Pins press into 0.125 " diameter holes on the Top Cover and push the circuit board down on the pogo pins. At least one Push Down Pin is required for every ten pogo pins, with a minimum of four.
Use 1.050 " long pins for normal applications.

| Item | Order Number | Price 1-9 | Price 10+ |
| :--- | :---: | ---: | ---: |
| Push Down Pin; 1.050" long | FMP00022.1050 | $\$ 6.00$ | $\$ 4.00$ |
| Push Down Pin; 0.800" long | FMP00022.0800 | $\$ 6.00$ | $\$ 4.00$ |

## More Information

For more information about designing and fabricating Versi-Traq Test Fixtures, see the Versi-Traq Design Guide (DOC-00038).
